Identify the skills needed to be a responsible friend and family member.	85.7%	14.3%	0%	21
Become aware of the academic skills required in various careers.	71.4%	23.8%	4.8%	21

REFLECTIONS...

- It was quite surprising that there were some respondents who felt that it was not important for students to become aware of career interests, handle anger in a positive way, become aware of academic skills in various careers, and learn to set high expectations.
- All of these areas of competencies are critical in the elementary arena. It is important in the primary grades to build a solid academic, social/personal, and career foundation. As students become older, they will be equipped with the necessary tools to be proactive in their development instead of reactive.
